DETAILED ACTION

1. Upon review of Applicant's response filed July 21, 2006, it is noted that a restriction/election is warranted. Any inconvenience to Applicant is regretted.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5 and 7-8, drawn to an apparatus, classified in class 345, subclass 614.
- II. Claims 9 and 11-13, drawn to a method, classified in class 358, subclass 518.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another and materially different apparatus such as a printer for printing color image. In addition, the apparatus as claimed can be used to practice another and materially different process such as a process for gamut clipping of a color image.

Art Unit: 3663

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
